Summary

Software Engineer with 5+ years of experience building full-stack web applications using Node.js, TypeScript, Kotlin with Spring Boot for backend APIs, and React for frontend. Utilizes LLMs such ChatGPT, Claude, and Gemini to accelerate implementation, debugging, code review, technical research, architecture exploration, and continuous learning.

Experience

Paynamics Technologies Inc. | Software Engineer | July 2025 – Present

- Optimized an audit log service handling 190M+ records, improving query performance from timeouts to sub-300ms responses.
- Developed a secure invoice series allocation API using Kotlin and Spring Boot, implementing validation, sequential range allocation, idempotency, concurrency-safe database constraints, and tenant/subtenant data isolation in a multi-tenant environment.
- Built full-stack features for a financial platform using Node.js, React, Kotlin, and Spring Boot.
- Debugged and resolved issues across the stack.

GSS Lab Inc. | Software Engineer | Aug 2023 – Jan 2024 (5 months)

- Developed REST APIs for a matching platform using Node.js/NestJS, MySQL, and TypeORM.
- Designed a solution for an affiliate marketing system using Next.js, PostgreSQL, and Prisma.
- Integrated cloud services into applications using GCP (Cloud SQL, Cloud Run) and AWS (S3, RDS).
- Built front-end components and integrated backend APIs into React/Next.js applications.

Samsung R&D Institute Philippines | Full Stack Engineer | Jan 2022 – May 2023 (1 year & 4 months)

- Developed full-stack features for an internal engineering platform using Node.js, React, and MongoDB.
- Maintained and enhanced Python-based ETL pipelines for automated data processing.
- Debugged and resolved issues across the entire stack.

Cauld & Clark Information Technology Solutions | Software Engineer | Mar 2021 – Dec 2021 (9 months)

- Created GraphQL and REST APIs for a dental clinic system using Node.js/NestJS and MongoDB.
- Developed e-Receipt modules for a fintech startup using Node.js/TypeScript and PostgreSQL.
- Delivered full-stack outsourced development tasks using Node.js, React, and PostgreSQL.

Technical Proficiencies

Languages & Frameworks: JavaScript, Node.js, TypeScript, NestJS, Python, Kotlin, React, Next.js, Spring Boot
Databases & ORMs: PostgreSQL, MongoDB, MySQL, TypeORM, Mongoose, Prisma, Drizzle, Bookshelf
Cloud: AWS (S3, RDS, CloudWatch), GCP (Cloud Run, Cloud Storage, Cloud SQL, Artifact Registry)
AI-Assisted Development: ChatGPT Codex, Claude Code, Google Gemini
Other: n8n, Convex, Supabase, Git, GitHub, GitLab, Docker, REST, GraphQL, tRPC, Jira, ClickUp, Tailwind, Jest, Vite

Education

FEU Institute of Technology – Metro Manila, PH
BSc Computer Science | 2011 – 2015
